Studio Light Setup

Instructions

UNPACKING LIGHTS

- 1) Unpack carefully
- Remember component placement

- 2) Remove black insert
- Lightheads and lamps

- 3) Remove contents
- Softbox cases, tripods and head adaptors

- 4) Layout all components for assembly

TRIPOD & LIGHT SETUP

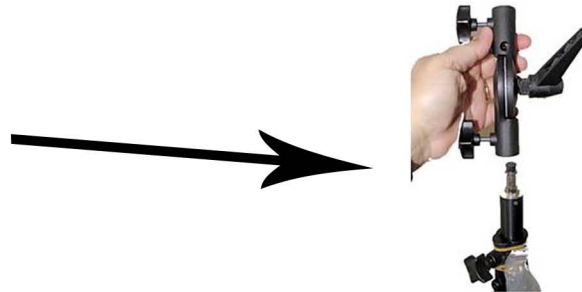

1) Open Tripod

- Loosen all thumb screws
- Pull middle screw UP to open
- Open until all 4 legs are on floor
- Lock bottom and mid-screw
- Do not raise yet

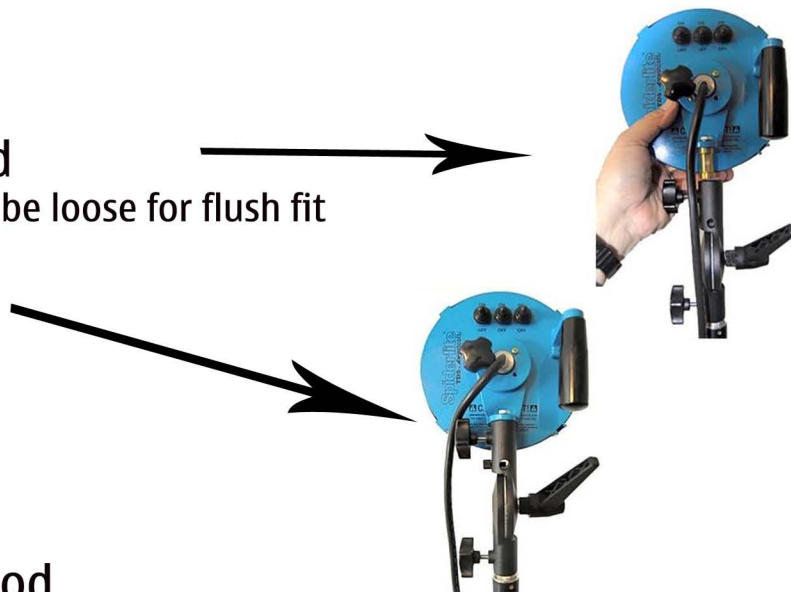

2) Place light head on tripod

- It fits flush with tripod

3) Place light on stand

- Thumb screw needs to be loose for flush fit
- Tighten securely

4) Repeat for 2nd tripod

SOFTBOX SETUP

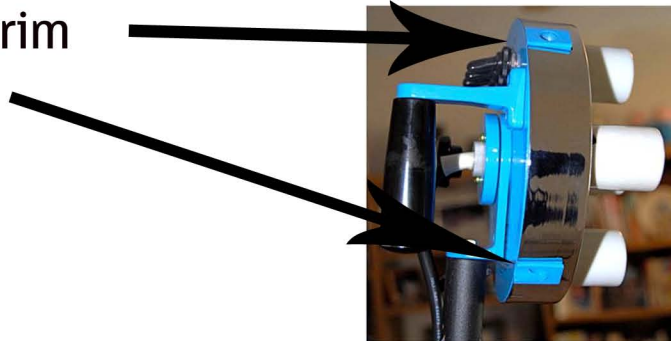

1) Remove softboxes from cases

- One large & one smaller
- Insert rods at each corner
- Set aside white diffusers

2) Locate 4 holes around light rim

- One has SLOT (use this last)

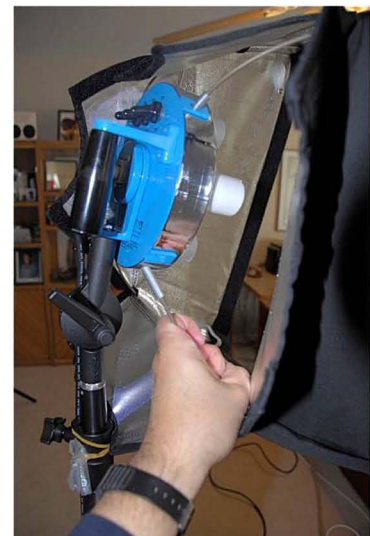

3) Insert rods from softbox into light

- Start at top and end at slotted hole
- YES, you will need to BEND the rods to install all rods

4) Repeat for 2nd softbox

INSTALLING LIGHTS & DIFFUSER

1) Insert center bulb first

- Insert the rest carefully
- Five bulbs for each light

2) Insert diffuser

- Velcro to inside the softbox
- Seal all edges

3) Repeat for 2nd light

4) BREATHE, you're done!

FINAL SETUP

1) Light placement

- Place larger softbox in the center about 10' from backdrop
- Place smaller one to the left side about 8' from backdrop
- Raise the center light to 8' and tighten securely
- Raise the left light to 6' and angle slightly to center light
- Turn on all bulbs using the 3 switches

2) Make sure the stands have 4 feet on the floor!

- Center pole stabilizes

3) Set the front leg straight under the front
